

Hiring: Backend Developer

anyThing Connected offers an Internet of Things sticker that allow developers to add apps to any product, without hardware knowledge. Without hassle. Loo up www.anything-connected.com for more information!

We are a fast growing startup based in Delft and are looking for a backend developer who wants to join our cozy team. Someone who shows initiative and isn't afraid imagine ambitiously with us!

Do you have:

- A college or university degree
- Affinity with the Internet of Things
- Experience in NodeJS and database management

Android or iOS app development knowledge is an advantage

We offer:

- A chaotic office space in Yes!Delft, the startup hub of Europe
- Collaboration with experienced TU Delft academics in the field of pattern recognition
- Ample of space to define your own tasks
